

PLATELET RICH FIBRIN (PRF)

Platelet-Rich Fibrin, or PRF, is being hailed as the new generation of Platelet-Rich Plasma, or commonly known as PRP. While PRF provides all the same benefits as PRP, it is more advanced because PRF releases more growth factors over time which means that it continues working for your body even after the procedure is done! PRF can treat sunspots, acne scars, large pores, hair loss, signs of aging, hyperpigmentation, rosacea, and more.

WEIGHT LOSS MANAGEMENT

Let Infusion Care start your journey to a healthier you. Our weight loss memberships are so much more than calorie counts and food logs. It's a full wellness approach to weight loss and can include weekly Semaglutide injections, fat burning injections and infusions, and consultations with our Nurse Practitioner and Certified Health Coach.

BIO-IDENTICAL HORMONE REPLACEMENT THERAPY

Hormones are integral to the efficient functioning of the many cells, tissues, and systems in your body. Hormone changes can be normal and healthy, but many men and women experience hormonal fluctuations beyond what is physiologically normal. These fluctuations can impact your mood, metabolism, cognition, and physical structure. Long term hormone deficiencies can increase your risk for several chronic health conditions.

Common symptoms associated with hormone deficiency include decreased sex drive, low energy, weight gain, muscle loss, sleep disorders, anxiety, mental fog, hot flashes, decreased skin elasticity, hair loss, and many others.

If you are experiencing any of the symptoms mentioned above or have more questions regarding bioidentical hormone replacement therapy, please schedule a consultation with one of our providers.

INFUSIONS

CONGNITIVE REPAIR/NAD+	\$280 SINGLE
Peptide therapy to combat aging. Can also be instrumental in overcoming addiction, depression, injuries, and more	\$900 4 PACK
